

Sirs

The Low power FM issue is of special concern and need for me and my community here in Gilbert AZ.

I listen to KLOVE on FM Translators here and on my business travels throughout the USA regularly during the year.

If LPFM is instituted to excluded KLOVE FM translators myself and many other needy people will be left without service.

I emlore the FCC to consider the needs of the many current users of FM translators and do not displace them.

We are well served by their present function.

Respectfully,

James L. Geiger MD MS CCAP
